The Green School Committee has been very busy working on the biodiversity theme for the last year.

Biodiversity is the variation of all life forms from the tiniest of bugs, to the plants they feed on, to the biggest whales in the sea. Biodiversity keeps us alive, therefore it is vital we conserve it

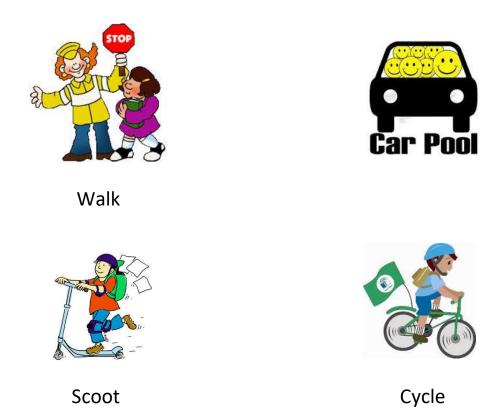

All classes are partipating in a variety of activities to increase our awareness of biodiversity in our school. See list below:

- Biodiversity collages
- Tree surveys
- Mini beast surveys
- Biodiversity projects
- Creating an mini beast hotel in the school garden
- Planting activities in the school garden

We will carry out a biodiversity survey in January to see how much everybody knows in the school after doing their activities on Biodiversity - good luck everybody!

TOT Day - Travelwise on Thursday

We also continue to encourage families to leave their cars at home when they are coming to and returning from school. If this is difficult maybe you could do it one day a week - on a Thursday. Please try to:

Park 1km away from the school and walk
